

Antibacterial Laminate

Reduce Bacteria by **99.99%** in 24 hours

Curtail the spread of bacteria-causing diseases and provide safe surfaces for your students and teachers with AB+ Laminates. These specialty laminates contain a proprietary additive that inhibits the growth and spread of bacteria and fungus. AB+ is available on nearly all of our laminates so you can show your school spirit with custom colors and graphics.

AB+ Antibacterial Laminates Are:

Antibacterial for Life

Treated to the core of the product, our laminates inhibit the growth and spread of bacterial colonies by 99.99% within 24 hours.

Easy to Clean

Simply wipe down with soap and water or use any alcohol-based or disinfecting cleaner when sanitizing is of utmost importance.

Available in Specialty Finishes

We offer a wide range of textures and finishes to fit your unique project. Choose from woodgrain and stone textures, abstract designs and more.

Scratch & Impact Resistant

Unlike hardwood, laminates are resistant to scuffs, scratches and dents. Our laminates are impact resistant to NEMA LD-3 standards.

Proven Effective On:

- **E. coli** (*Escherichia coli*)
- **Listeria** (*Listeria monocytogens*)
- **Salmonella** (*Salmonella typhae*)
- **Staph** (*Staphylococcus aureus*)
- **P. aeruginosa** (*Pseudomonas aeruginosa*)
- **C. albicans** (*Candida albicans*)
- **E. faecalis** (*Enterococcus faecalis*)

99.98%-99.99% reduction in 24 hours. Verified by SGS and Industrial Microbiological Services LTD. Full report available upon request.

Did you Know?

According to the CDC, public school students in the United States miss **3 MILLION** school days each year as a result of pink eye. One of the most common bacteria to cause pink eye is *Staphylococcus aureus*.
